PROFILE

I am a 24-year-old reliable and motivated individual with strong attention to detail, excellent organizational skills, and a positive attitude. I thrive in both team environments and when working independently. Known for being dependable and adaptable, I approach tasks with focus and commitment. I enjoy learning new skills, take initiative when needed, and work well under pressure. With a strong work ethic and professional mindset, I aim to contribute positively to any workplace and grow continuously in my career.

EDUCATION

●	National Institute of Business Management (NIBM)	2024
	Higher national diploma in software engineering	
●	National Institute of Business Management (NIBM)	2023
	Diploma in software engineering	
●	GENERAL CERTIFICATE OF EDUCATION(A/L) EXAMINATIONS	2021
	- Combined Maths - Chemistry - Physics	S S S
●	GENERAL CERTIFICATE OF EDUCATION(O/L) EXAMINATIONS	2017

PROJECTS

Patient Record Management System (MERN)

- developed a MERN-based application to digitize and manage patient records efficiently.
- implemented JWT-based authentication to secure user access.
- designed scalable REST APIs for patient data management.
- Built a responsive React UI to improve usability for clinic staff.
- improved data accessibility and reduced reliance on manual record keeping

E-Commerce Web Application (Spring Boot, React.js)

- Led a development team to build a full-stack e-commerce application using MVC architecture and Agile methodology
- Developed and managed backend services using Java and Spring Boot, focusing on product management and user authentication
- Designed and implemented RESTful APIs for core e-commerce functionalities
- Performed API testing using Postman to ensure the reliability and accuracy of all endpoints

Baby Care Monitoring System (C/C++, React.js)

- Built a real-time IoT baby monitoring system using ESP32 and sensors (temperature, sound, smoke).
- Used C/C++ (Arduino IDE) for hardware programming and sensor integration.
- Integrated Firebase for real-time cloud database and remote monitoring.
- Developed a responsive frontend using HTML, CSS, and JavaScript to display live sensor data.
- Implemented an alert system to notify caregivers of unsafe conditions.
